

Dear VALUED Robin Hood Water User Association Member,

This letter is to remind everyone of the IMPORTANCE of turning OFF your water at the valve box if you're away from your property for more than 24hrs. If for any reason you are unable to turn off your water due to defective valve, it is YOUR responsibility to call Steve Brito 575 921 6095 or Parker Cheney 402 630 5702 or any board member for assistance. All board members numbers are posted on bulletin board at entrance to Robin Hood. Failure to do this could result in fines for any leaks on your property. It is absolutely necessary for EVERY member to do their part to protect our water supply.

PLEASE break down all trash, including boxes, BEFORE putting it into dumpster. If you cannot break them down, take them to Cloudcroft. Do NOT put any that don't fit, beside, behind, or near dumpsters. We are charged extra fees to dispose of these items. If this continues, this could result in higher water fees.

We are in DIRE need of a new Treasurer by the next annual board meeting. If you are interested, please notify Sue Leeah, or any board member. Training will be provided and duties explained.

Sincerely,
Robin Hood Water Users Association
